ETIP HYDROPOWER: shaping the Future of Sustainable Hydropower in Europe

ETIP HYDROPOWER activities to unify the voice of hydropower across Europe

Antonella Frigerio, RSE and ETIP HYDROPOWER

Advantages for Industry to join ETIP HYDROPOWER

Jean-Jacques Fry, ETIP HYDROPOWER

WG Hydropower role for flexibility and storage - Key points about flexibility and storage

Leonardo Nibbi, CREAR - Università di Firenze

WG Hydropower and biodiversity - Key points about biodiversity

Andrea Abbate & Marco Tangi, RSE

WG Hydropower and climate change - Key points about climate change

Arianna Trevisiol, RSE

Advancing Hydropower and Pumped Storage in Europe: World Hydropower Outlook 2025 and The Paris Pledge

Matteo Bianciotto, IHA

Open discussion and closing of the Workshop

Hydropower plays a vital role in Europe's clean energy transition, offering flexible, reliable, and renewable electricity generation.

This workshop introduces the European Technology and Innovation Platform on Hydropower (ETIP HYDROPOWER), a strategic initiative that brings together key stakeholders from industry, research, and policy to drive innovation and sustainability in the hydropower sector.

Participants will explore the platform's mission to strengthen the role of hydropower in achieving EU climate and energy goals, while ensuring environmental responsibility and social acceptance.

The workshop will present ETIP HYDROPOWER's structure, working groups, and priority actions, including its contribution to the Strategic Energy Technology Plan (SET Plan).

The session will highlight how ETIP HYDROPOWER facilitates dialogue, supports evidence-based decision-making, and promotes collaborative approaches to address technical, regulatory, and market challenges. Attendees will gain a clear understanding of how to engage with the platform and contribute to shaping the future of hydropower in Europe
